We Let The Experts Do The Talking

WELLSKIN Glaxal Base voted #1 recommended brand by Pharmacists across Canada again this year.

Oakville, Ontario, May 4, 2009: WellSpring Pharmaceutical Canada is proud to announce that the recent "2008 Over-the-Counter (OTC) Counseling and Recommendation Survey" conducted by industry magazine *Drugstore Canada* and *l'actualite Pharmaceutique* shows that **WELLSKIN Glaxal Base** is the #1 recommended brand by Pharmacists in the following categories:

#1 Moisturizer/Dry Skin

#1 Dermatological Skin Care

#1 Extremely Dry Skin Product

Glaxal Base cream is the optimal skin moisturizer for dry, aging and sensitive skin, and Glaxal Base lotion is the ideal solution for everyday skin care.

"We are, of course, thrilled that Glaxal Base has received this recognition once again," said Bonnie Feeney, President of WellSpring Pharmaceutical Canada. "It makes us especially proud that the Pharmacists of Canada have spoken and voted for us. Receiving this

sort of feedback from the experts we all rely on for advice of this nature means that Glaxal Base truly is Canada's favourite moisturizer."

Used and recommended by Physicians and Pharmacists, Glaxal Base has been clinically proven as an effective treatment for extreme skin conditions such as eczema, psoriasis, rosacea, and the painful dermatitis caused by radiation treatment. In fact, Glaxal Base is recommended by a significant number of Canadian Radiation/Oncology Centers.

Glaxal Base is specially formulated to nurture and protect skin. The oil-in-water emulsifying characteristics moisturize the skin by providing a layer of oil on the surface of the skin to slow water loss and thus increase the moisture content of the skin. Glaxal Base is hypoallergenic, perfume-free, lanolin-free and non-greasy.

Glaxal Base has a 40-year history; this longevity can be attributed to its effectiveness as a moisturizer. Glaxal Base creams and lotions are more effective for long-term relief than products that simply lubricate or grease the skin temporarily. Glaxal Base relieves dryness and its thick consistency prevents moisture from leaving the skin. Also, unlike many cosmetic moisturizers, Glaxal Base is hypoallergenic with no perfumes and this minimizes irritation.

WELLSKIN Glaxal Base Cream is available in a 50g tube, 100g jar & 450g jar and as a Lotion in a 100g tube and a 227g tube, as well as a Lotion with vitamin e in a 227g tube. WELLSKIN skin products including Glaxal Base, Barriere Cream and Allenburys Soap are available in pharmacies across Canada.
